Location:
Sales and marketing,
R&D office in Ukraine

Public information only!

Purpose: We're here to guide each other that one step further along a personal journey.

Our vision: *technology works for you, not the other way around. While others protected proprietary, stand-alone architectures, we focused on taking companies into the data-driven age, providing systems and software with the scalability and reliability needed to drive the future marketplace.*

Our mission*: to help our clients become real-time enterprises with systems that combine the scalability and resilience architecture with the real-time value of data.*
