LLC SPE "UKRZOOVETPROMPOSTACH" -

a leading manufacturer and reliable supplier of veterinary products for all categories and life cycles of animals. The company also produces balanced protein-vitamin feed additives, pre-mixes, full vitamin and mineral blends, as well as ready-made feed according to original recipes. The company started its work, as a fundamental platform for combining scientific and industrial capabilities to create high-quality veterinary drugs with carefully crafted formulations. Today, the company holds a stable leading position both in domestic and international market.

The use of high-quality raw materials from well-known world brands, compliance of production technologies with GMP and GMP+ standards, quality management system according to ISO 9001, ISO 22000 and strict control at all stages of production and storage guarantee the production of quality and safe products.

BASIC PRINCIPLES of the company

1

Professionalism

We create effective quality products

2

Honesty

We conduct business fairly, transparently and ethically

3

Development

We seek and implement innovations

4

Responsibility

We are responsible for our products

5

Partnership

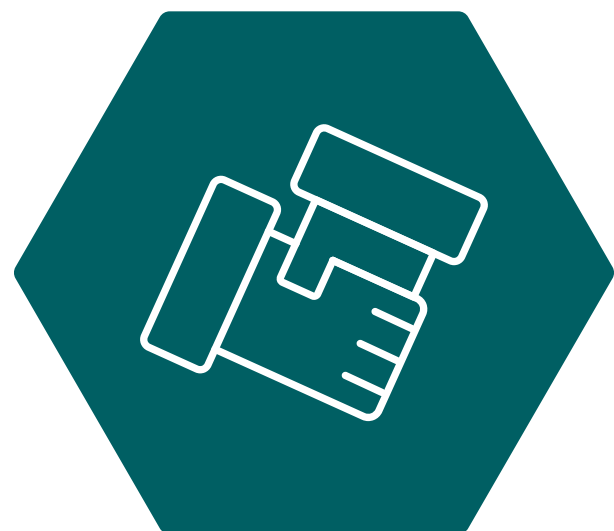

We support, help, teach

The philosophy of our company is clear and viable:

"Healthy animals - a healthy nation"

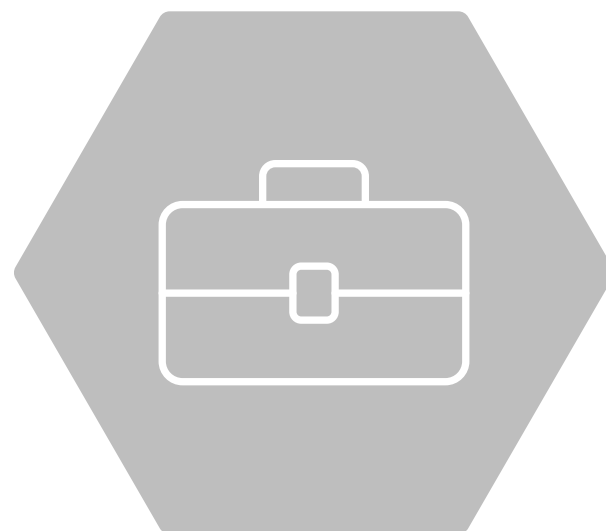

Own laboratories

High-tech equipment that allows the most complex laboratory research in all areas of veterinary and agricultural activities

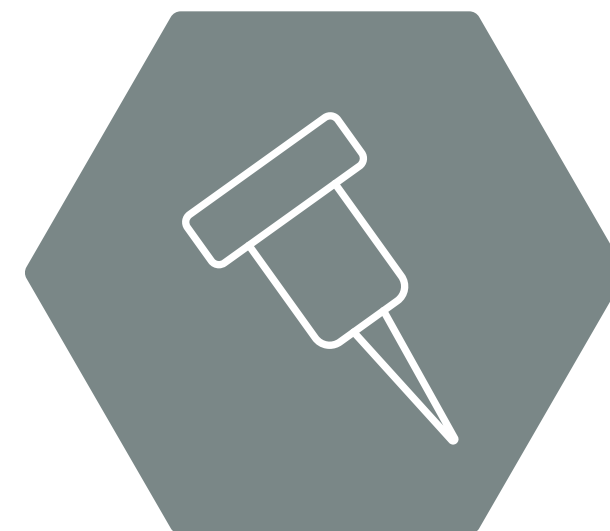

Own production

LLC SPE "UKRZOOVETPROMPOSTACH" produces exclusively high-quality, ecological and safe products for productive and domestic animals

Quality raw materials

Use only high-quality ingredients from world leaders, which are supplied under direct contracts, and quality control of finished products

OUR ADVANTAGES

Logistics system

Adjusted cargo delivery system to any location of Ukraine and neighboring countries in the shortest possible time

Modern warehouses

Large areas equipped with climate control systems for storage of raw materials and finished products

Scientific support

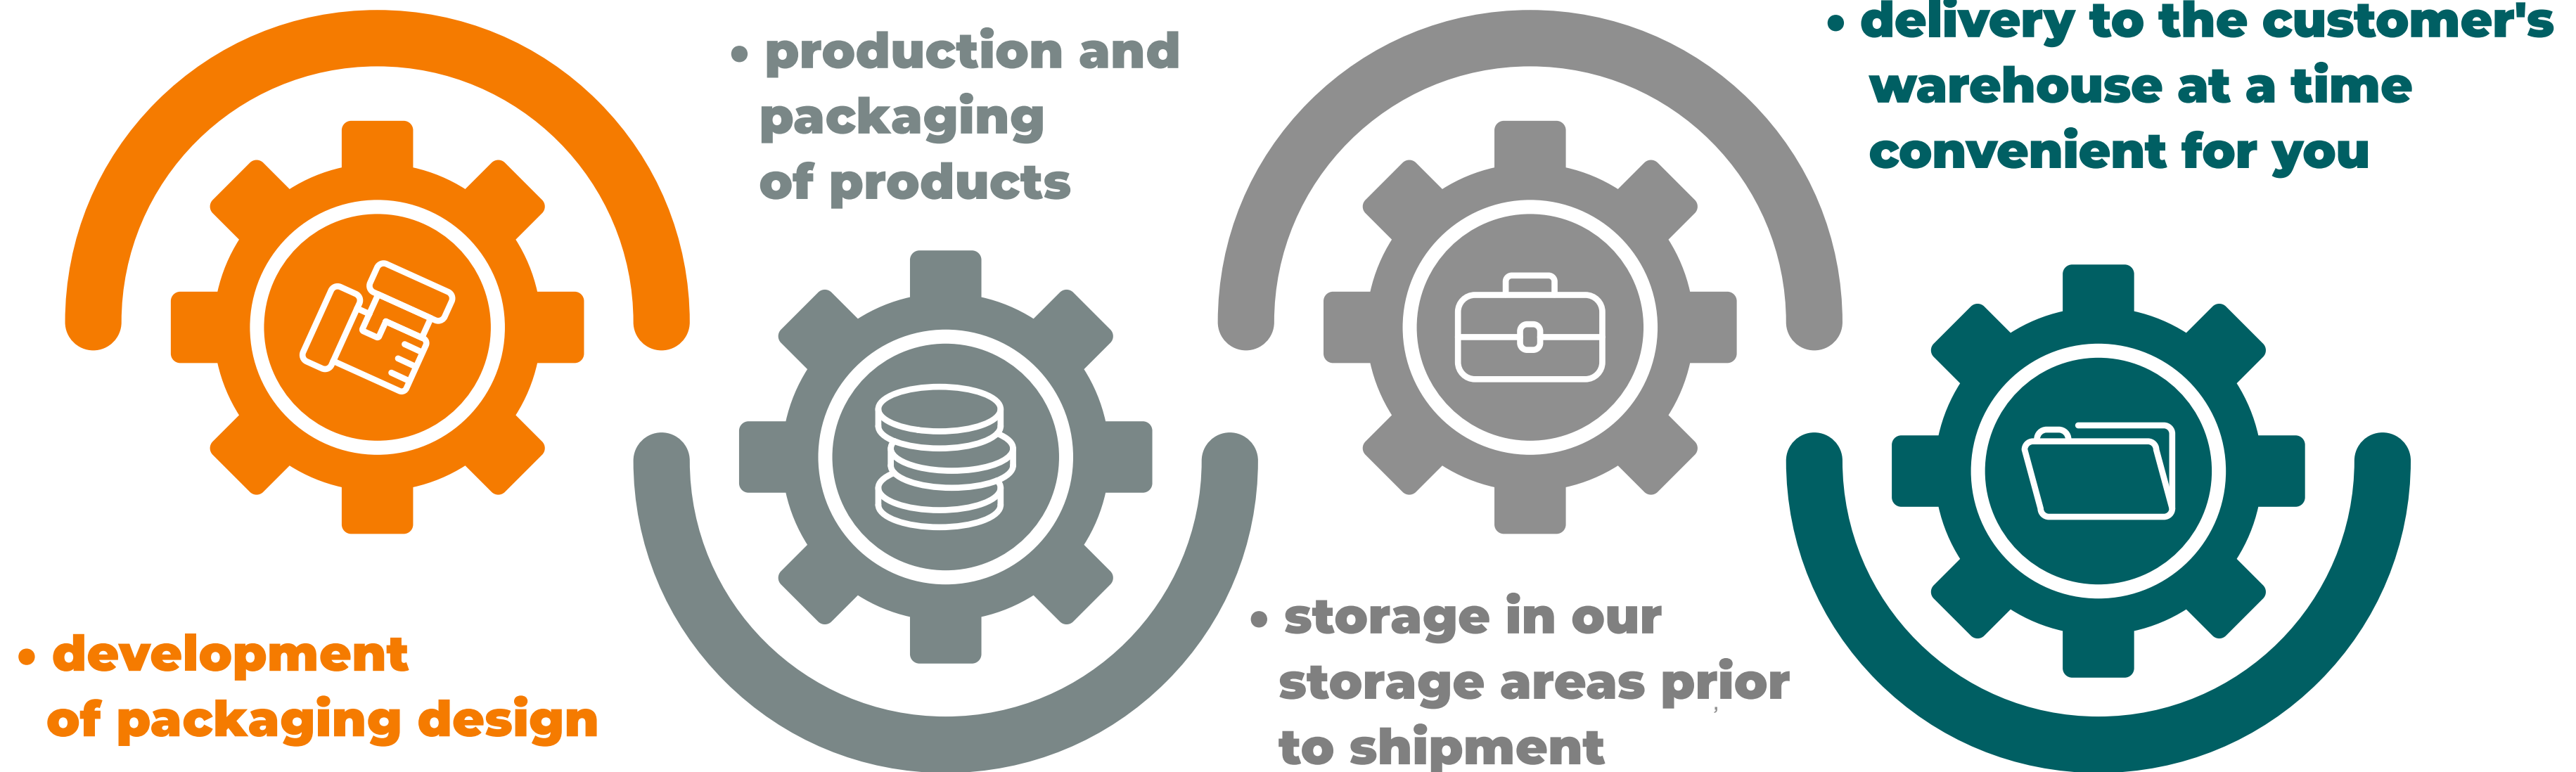

Our company provides customers with scientific support using advanced settlement programs of feeding

C e r t i f i c a t e s

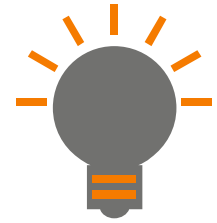

- ▶ Production is designed in accordance with GMP requirements (clean rooms n / k, D, C, B with zone A)
- ▶ The quality management system is implemented and functioning in accordance with GMP requirements
- ▶ GMP + quality certificate confirmed
- ▶ Production staff is trained according to GMP requirements
The quality management system ISO 9001:2015 and Food Safety Management Quality System ISO 22000:2005 are implemented and functioning

LLC SPE "UKRZOOVETPROMPOSTACH" invites partners for long-term cooperation and offers **FULL CYCLE contract manufacturing** of products under the trademarks of other organizations

* For production of medications customer must have a set of technical documentation

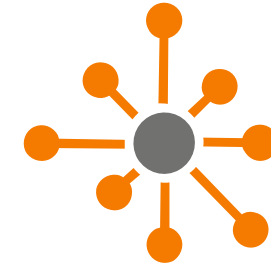

WHY CHOOSE US?

We develop and manufacture products with all requests and customer requirements and future storage conditions of the finished product

We have a longstanding practice of working with livestock and poultry farms

We are a manufacturer of our own products, which we sell through the online store, direct sales and a wide network of distributors

The system of discounts works for wholesale and regular customers

We always try to meet the needs and adapt to each client

All consultants and managers of the company have specialized education and are highly professional specialists

Our products meet international quality standards and easily obtains registration certificates

We are focused on effective cooperation and aim to meet all customer needs

PRODUCTION LOCATIONS

LLC **"EKO BIOZAHYST"**

LLC **"SPE "UKRZOOVETPROMPOSTACH"**

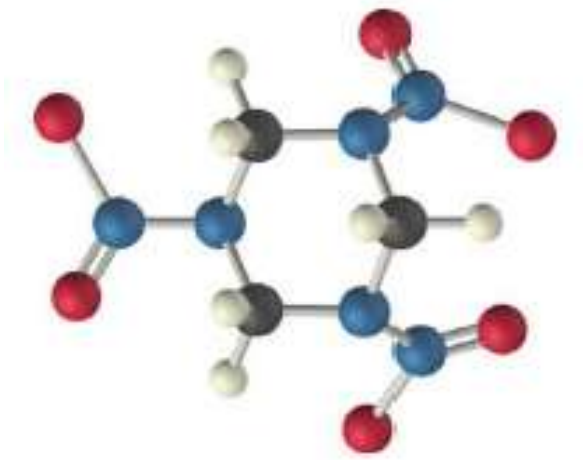

PLAKHTYANSKY KORMY.
PREMIX AND BMVD (PVMS) FACTORY

We make in aseptic conditions injection (infusion)

1. **VETERINARY MEDICINAL PRODUCTS**

2. Non-sterile veterinary drugs

3. Compound feeds, prophylactic and therapeutic additives, PVMS (Protein vitamin and mineral supplements), Premixes, whole milk substitute

Capacity of water supply system (HPW) - **450 l / h**, reverse osmosis water **800 l / h**

Air preparation area for **clean rooms**

The installed system of air preparation and air conditioning allows to supply and maintain the set level of air parameters of the working area, according to the class of clean rooms - A, B, C and D.

Visual inspection section

CJP washing and drying machines

Productivity:
3000 - 4000 vials / hour.

Marking and labeling section

Line for bottling liquid dosage forms and other non-toxic aqueous solutions in plastic containers of 100-200 ml.
Project capacity (annual) - 2 million bottles

Sink area for components of VLZ bottling machines

Sterilization room for consumables (purity class - C)

Laboratory of physicochemical analyzes

Control of finished VLZ

LABORATORY SERVICES

The company's own laboratories offer various types of quality control and testing methods

Own equipment

We carry out all tests of materials on our own modern equipment from world manufacturers

Accuracy of research

Guaranteed high quality and accuracy of our research, as well as timely preparation of protocols that fully meet modern standards

Qualified experts

Qualified staff using modern equipment for diagnostics and research, will perform all necessary investigations efficiently and in an agreed term

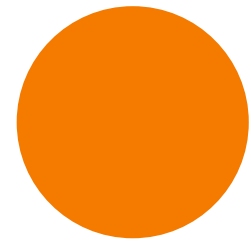

Confidentiality

Research is conducted to order for legal entities and individuals; the company guarantees the confidentiality of information received from the customer and all research results

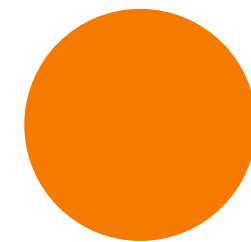

* The customer is responsible that the entire batch of products is identical to the sample provided for examination

OPTIONS OF LABORATORY RESEARCH

Package 1
Sample preparation
Determination of Moisture:
- Wet food
- Dry food
Determination of crude protein
Determination of crude fat
Determination of crude fiber
Determination of phosphorus
Determination of calcium
Determination of crude ash
Determination of grinding size
Determination of protein (according to Barstein)
Determination of the total content of chlorides, sodium, salt
Determination of urease
Determination of acid number
Determination of peroxide number

Package 2
Determination of active acidity
Determination of total acidity
Determination of organic acids
Determination of the total toxicity of bioassay on colfod infusoria
Determination of neutral-detergent + acid-detergent fiber
Determination of soluble carbohydrates and those that are easily hydrolyzed (starch, sugar)
Determination of urea in milk

Technological corridor
of clean rooms
(class C, D)

Technological clothing
preparation area for clean rooms

**total area of
warehouses 290m²
(257m² and 33m²)**

Products produced and controlled
by LLC SPE "UKRZOOVETPROMPOSTACH"
**stored in the modern warehouse
equipped in accordance
with GMP conditions**

Finished product storage area

Warehouse for storage of consumables

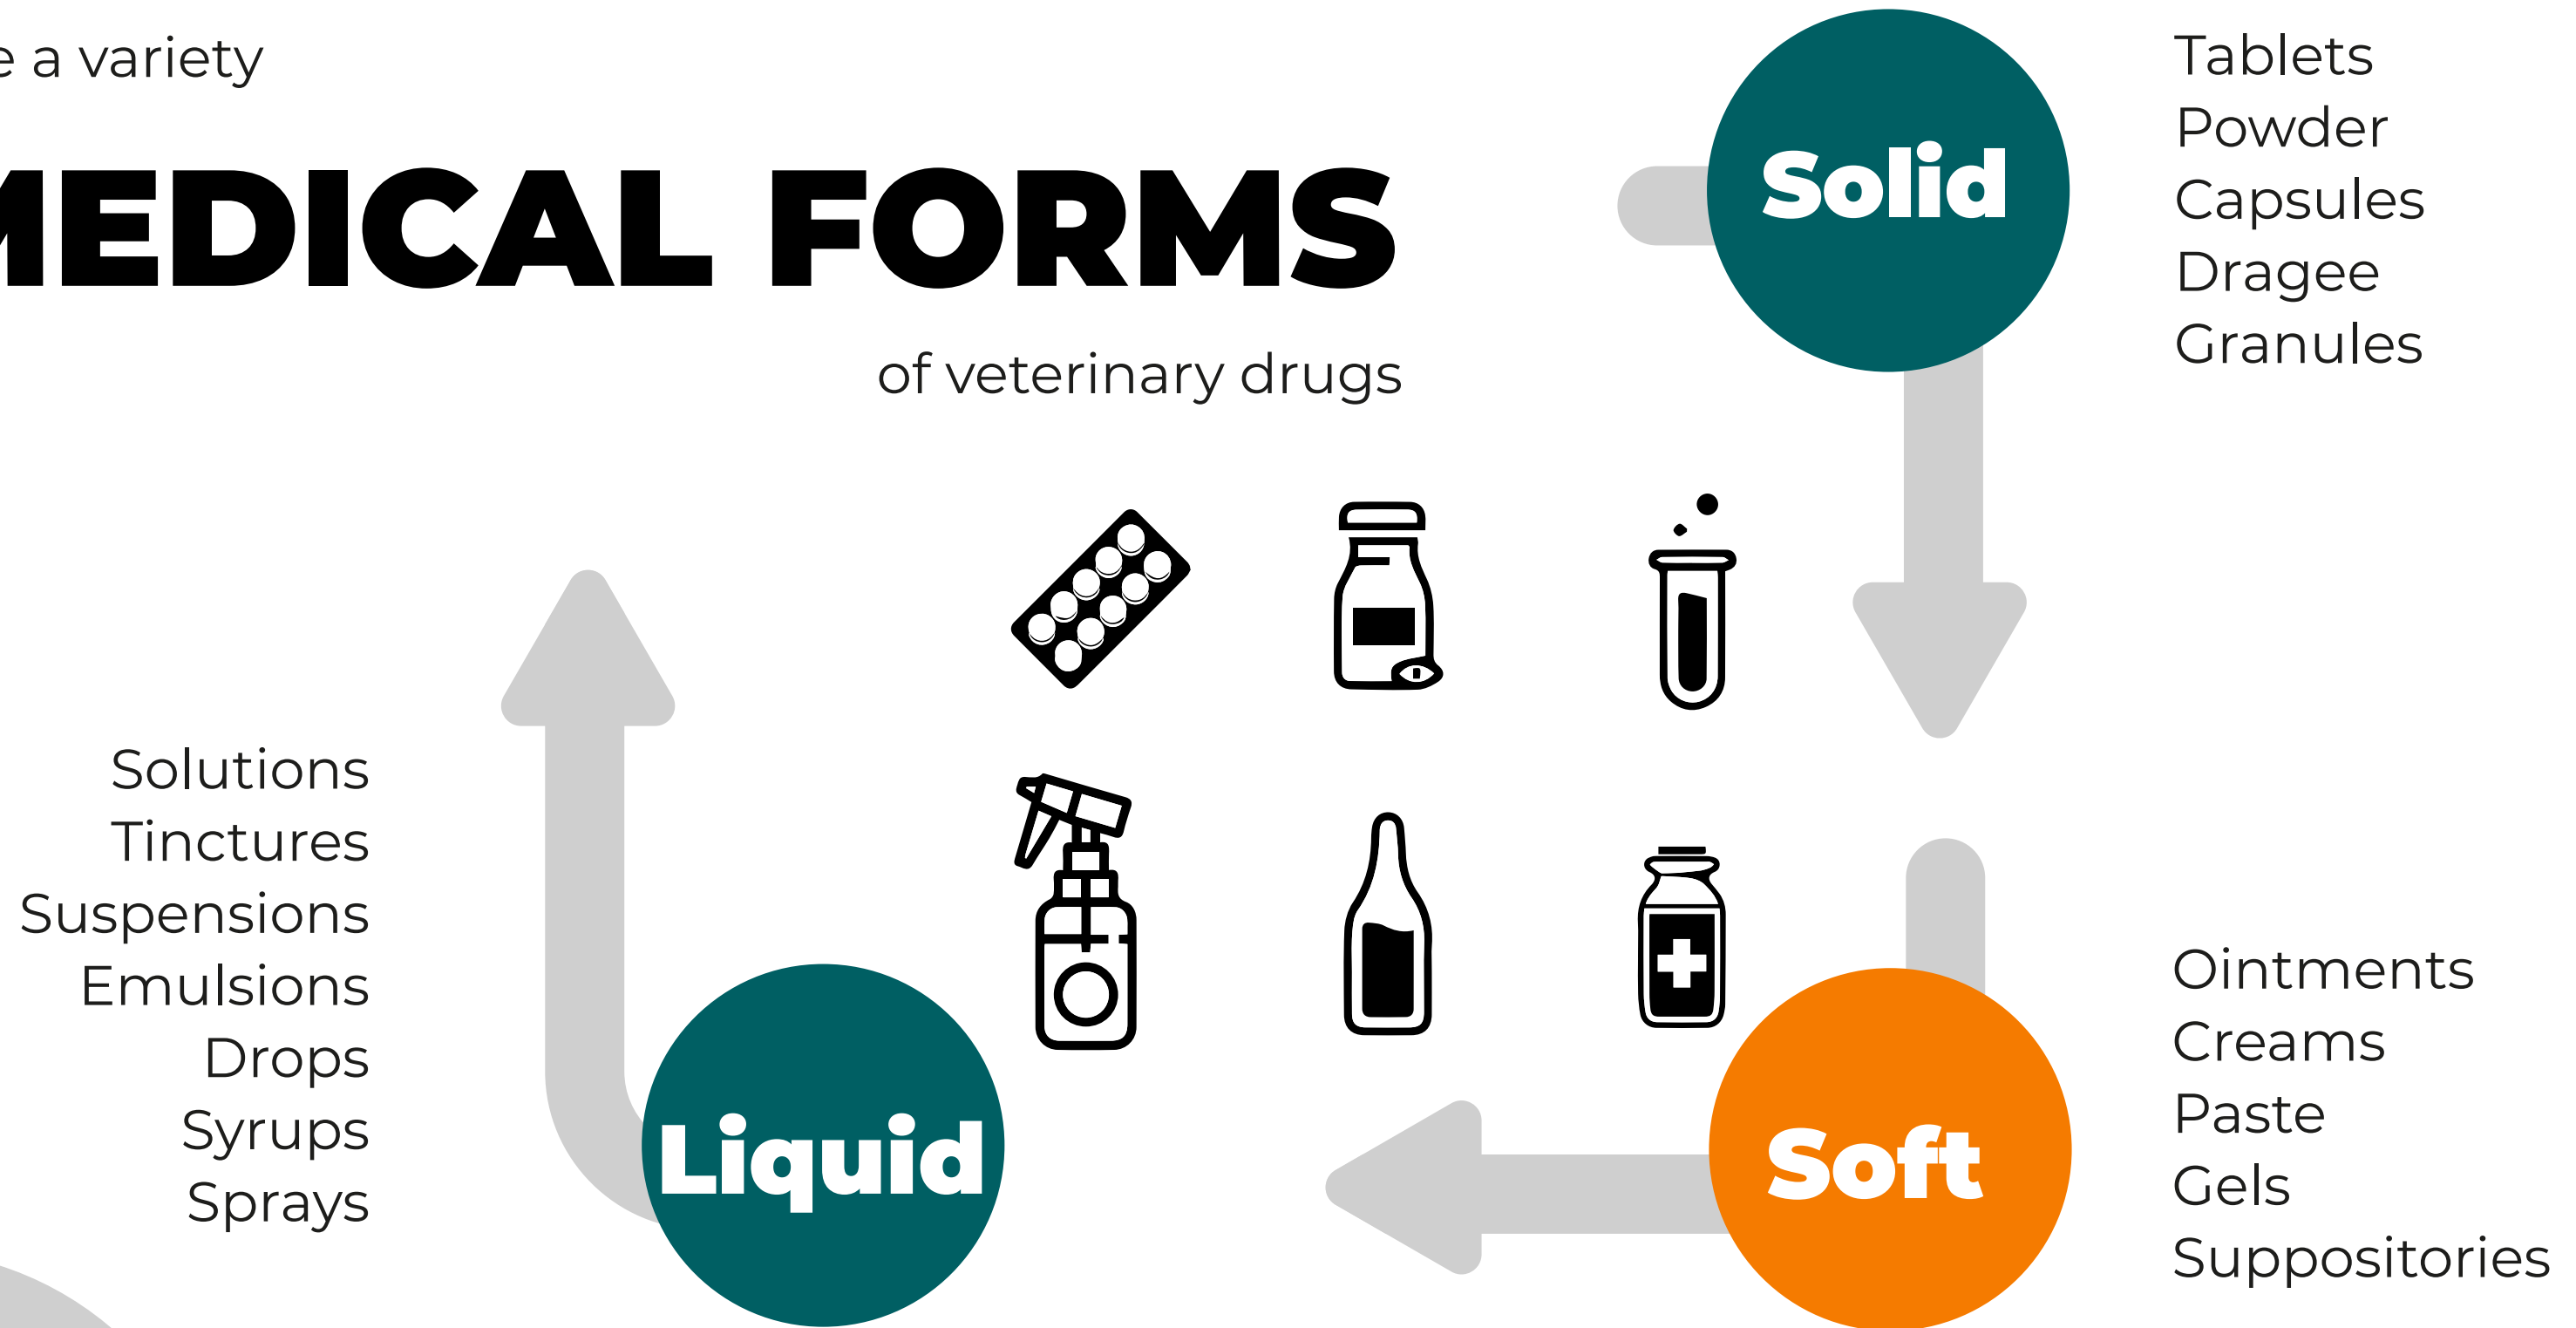

Quarantine area

We produce a variety

of MEDICAL FORMS

of veterinary drugs

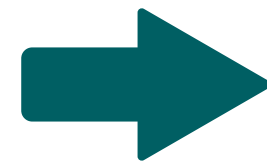

Different types of compound feeds and additives:

- FULL-FEED
- CONCENTRATES
- FEED MIXTURES
- PVMS (protein-vitamin-mineral supplements)
- PREMIXES

* possible production of BVD (protein-vitamin supplements), MKD (lactic acid feed additives) and other supplements.

Antiparasitic

Albendazole-L 7.5 % powder
Albendazole-L 10 % powder
Albendazole - 250, tablets
Albendazole-250, tablets with beef flavour
Closaverm-A, solution for injection
Levamisol - 7.5 %, solution for injection
Nemasectin paste
Novoverm, solution for injection
Oxyclozanide-600, tablets
Piperazine- 45 %, powder
Fenzole 22 %, powder
Fenzole 250, tablets

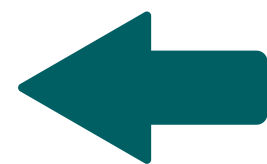

ANTI-PARASITIC

Antiprotozoal

Amprolium 22 %, powder for oral use
Dicladox, solution for oral use
Metronizole-K, powder for oral use
Ornidazole-50, solution for injection
Toltracox, solution for oral use

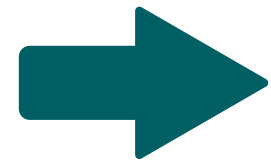

Insecticide and acaricide

Aversect 0.2 %, solution for external use
Deltokx, solution for external use
Insecticide and acaricide powder for external use
Flystop, solution for external use

ANTIMICROBIAL

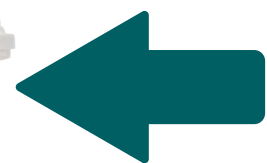

- Doxycyl, solution for injection
- Enrofloxin-K 5 %, solution for injection
- Enrofloxin-K 10 %, oral solution
- Penicillin, powder for solution for injection
- Probicil-3, powder for suspension for injection
- Probicil-5, powder for suspension for injection
- Septovet, powder for oral use
- Streptomycin, powder for solution for injection
- Farmatil 10 %, powder
- Farmatil-50, solution for injection
- Farmatil-200, solution for injection

ANTI-INFLAMMATORY

- Vetadex, solution for injection
- EQUIDOL, articular gel
- EQUIDOL, dual action gel
- Meloxicvet, solution for injection
- Meloxicvet, suspension for oral use
- Camphor oil

SULPHANILAMIDE

- Streptocide, powder for oral use
- Sulfadotrim, solution for injection
- Trimesin, tablets
- Trimerazin-L, powder for oral use

DRUGS FOR STOCK REPRODUCTION

Estrofalan, solution for injection
 Oxytocin, solution for injection

ANTI-MASTITIS

Mastamox, suspension

DERMATOLOGICAL

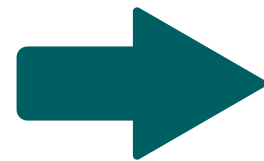

Vaseline
 Birch tar
 Ichtyol, for external and oral use
 DEK cream emulsion
 Vishnevsky ointment
 Zhyvylna ointment
 Ichtyol ointment
 Colaflox ointment
 Novertin ointment

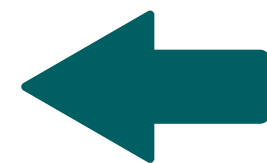

Oxytetracycline ointment
 Papilon ointment
 Sanofit ointment
 Sulphuric ointment
 Streptocide ointment 5 %
 Zinc ointment
 YAM-K ointment
 Powder for wounds

VITAMINS

- Veterinary first aid kit No. 1 for chicks, ducklings, goslings, turkey poult
- Veterinary first aid kit No. 2 for chicks, ducklings, goslings, turkey poult
- Veterinary first aid kit No. 3 for chicks, ducklings, goslings, turkey poult
- ZOOVIT-3, solution of vitamin A, D3, E in oil, for injection
- ZOOVIT-3, solution of vitamin A, D3, E in oil, oral
- Selenvit-E, solution for injection
- Forvit, solution of vitamin A, D3, E, F in oil for injection

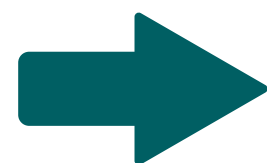

IMMUNOMODULATORS

- Anfluron, solution
- Vitazal, solution for injection
- Ichglucol, solution for injection
- Melavit, powder for oral use
- Tissue preparation by V. P. Filatov, suspension for injection

PROBIOTICS

Immunobacterin-D enzyme and probiotic feed supplement

PRODUCTS FOR SMALL ANIMALS «ZOOHEALTH»™

AcaroKILL, antiparasitic drops

Water for rearing cats “Zoohealth” feed supplement

Vormikil, tablets

Vormikil, paste for oral use

Vormikil, suspension for oral use

Hepatolik, suspension for oral use

ZooHealth Arthrolik, tablets

Zoohealth, eye/ear drops, solution

Triosan cream

ZooHealth rectal suppository

Cyprolac, tablets

UroLik, suspension for oral use

ZooHealth cough tablets

FOR DIGESTIVE SYSTEM

Gastric tea liquid extract for veterinary medicine

Vaseline oil

Veratrum tincture solution for internal and external use

Ricinic oil

Lactic acid preparation

Timpanol-K, solution for oral use

veterinary drugs

SOLUTIONS

- Water for injection
- Glucose 40 %, solution for injection
- Calfostim, solution for injection
- Calcium gluconate - 20 %, solution for injection
- Calcium chloride solution 10 % for injection
- Sodium chloride solution 0.9 % for injection
- Novocain solution 0.5 % for injection

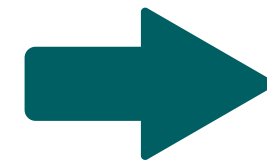

ANTISEPTICS

- Denaturated alcohol-K solution
- Brilliant green solution
- Iodinol solution
- Antiseptic drug Sanovet-70, solution
- Antiseptic drug Sanovet-95, solution
- Iodine preparation, solution
- Chlorhexidine 0.05 % solution

DISINFECTANTS

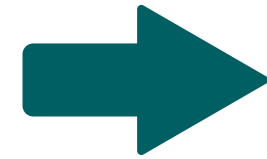

- Biodez, disinfectant
- Biodez-R, detergent
- Biocontact Plus, disinfectant
- Iodezol, disinfectant

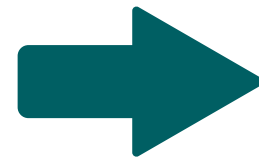

PLANT PROTECTION

Aktofit biopreparation (aversectin C, 0.2 %)

PRODUCTS FOR BEES

Fluvalisan strips

ORGANIC WASTE RECYCLING PRODUCTS

Skarabei, biodisposal agent for waste pits and septic tanks

RODENT CONTROL

LastMeal, bait for rats and mice control
Bait with Lanirate™ for rats and mice control

Goods for the garden

MEDICAL COSMETICS

- Berizka Shower Gel
- Zhyvylnyi cream
- Forestyn Cream
- DEK cream emulsion
- Aversect ointment
- Berizka Mask
- Berizka Liquid Soap
- Berizka Shampoo

DIETARY SUPPLEMENTS

Stymul, dietary supplement

Therapeutic cosmetics

FEED GROUP

PVMS (Protein vitamin and mineral supplements)

Calf Milk Replacer

Compound feed (Plakhtianski Kormy™, Ecorn)

MILK-Energy

Premix

Fodder group
